Observer Pattern

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantumInserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "survaillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

Releases serotonin / dopamine, the unfiltered smoke is bad for the lungs, the arteries... It is currently an illegal self-medication. From medical point of view without consulting a doctor it is not the best idea to smoke weed. Because of the sedation the processing of consolidation of the things experienced in his live is skipped, which will lead later into a psychosis and reduces the resilience of the individual. Often used to obfuscate illegal human experiments for example t* cards. Can have a pain-relieving effect. Maybe helps against Epilepsy. Consumers show more ignorance that can help in some stress situations (but consider m49, m50 card). Additional the person that smkes weed seems to focus more on the non-verbal communication.

Crypto Beginners-Toolkit

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good excercise, then continue maybe with Vigenère cipher, and then p-boxes and s-boxes.
Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you dont join the crypto-anarchy movement.
Work in pairs of at least 2 people, If they want to put you in mental institution to erase your brain you have better chances to prevent that.

i dont have a lot of time *INSERT: since they target me permantly* <- psychological warfare but if you have time it's quit easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-red13 you have again the original...

JOKER CARD

Inventor: ME!!!!! **Year:** ~NOW

If you are younger than 40 feel **FREE TO SAY AS MANY WRONG THINGS as you like**. It's not up to you, to teach or to fix people that are older than you how they could have done things better, but do it better yourself and give this card also to the younger generations and don't make the younger generations clean up your mess like the 1950s Generation did to us:https://de.wikipedia.org/wiki/Sonderm%C3%BClldeponie_K%C3%B6lliken

Use Cases

If an older Person gives you a bad feeling, if you said something wrong, it's not worth it to invest your time into his "lessons". often the **teacher** (**Sophist** opposite of a philosopher) just compensates his own self-esteem at the expense of his students...

update: some of the hostages are institutional honeypots, for example if i found out about the fact that mental institutions are used by the cia (MindColtrol=Psychology=Psychiatry...) then we of course would try to free ioerror's mother, but possibly the cia created this situation just in case that someone like me that was already in mental institutions would find out about this dirty "game".
So "possibly" there is already a big team that waits on people that try to free jacobs mother, so best way would be to help and suport that people (eg. g2/ma8 people) that were already in the same mental institution help them and ask them for help and information(s). It would be likely that not just in the case of iorror the mental institutions go after the whole family and also use m50 card in the family

consider cards: a14, a15, m124
DANGER: if this hypothesis is correct be aware of a16 cards
