TraumaBased Mind Control
gunshot noise to
add Permanent Record

They knew

9:13 AM - 31 May 2016

Inventor: xxxxx

Aarau seems to have a **gun-shot noise detection** that has multiple functions and seems to be widely abused against me -> KAPO AARGAU? <- FEDPOL
1. Detect gun-shots
2. With forced neurosis "smoke now" they send victims outside to smoke and then activates the inducet cough function to locate the victims for hunting them down or add proteine calculators to them (**disabled 2001**, $herFather is a bad police officer that is already a murderer, obligatorisches schiessen?)
3. to enter permanent records into the mainframe to the 3D Model of victims
Technically: **Vector Algebra** and many **microphones** in the town

Mutmassliches Deffence-System **Satans**

Mit genügend BigDATA (da reichen Metadaten) könnte man das **wie ein Fraktal** allenfalls sogar automatisch generieren.

Chains Rattling

m20

Year: ~????

Inventor: xxxxx

Most children are "shipped" with items / behavioral patterns (or maybe it's just a technology card) to make noise, Satan then uses these functions (stimuli-response-habits) to terrorize people, relatives, targeted individuals. They play eg dt1 card on the parent and then activate the rattling function on the kid. In the end parents would hate the kid, or one of them. = psychological Warfare. The child gets "incentives" when it uses such functions and is not aware about the effect to victims. see m11, t1.... cards. To intimidate the victims (who do not directly see where the "chain rattling" comes from), The Child: "Yay, making noises (unheard: then I'll be less ignored, and incentives)"

Hohle Gasse

Die **hohlen drei Sünder** warten in der Hohlen Gasse auf den der es wagt den Hut Gesslers nicht zu grüssen. Also die Sage von Wilhelm Tell macht sich eigentlich lustig über die Armee und den Soldaten wird es so verkauft, als seinen sie jetzt super duper edle eingeweihte Studenten der Studentenverbindung Habsburger oder dass sie jetzt das super duper Geheimnis der Umgekehrten Psychologie kennen würden...

INK BLOT TEST FIXATION

m1

Inventor: Hermann Rorschach Year: ~1900

Sold as a "phantasy test with formless blobs for children, normal adults and for mentally ill", in fact it distracts the questioned (fixation) so he not focuses to much on the questions. A Hack would be to add an eg. RFID or LC circuit on the backside of the paper and to activate small Active Denial Systems or Hum Noises or treble Sounds arround 15'000Hz below the conscious perception threshold to let the questioned act as a liar since his face would show stress because of the active denial system that was activated. Using an inkbolt test as "lie detector" would therefor fail in some cases.

Scheme of childlike characteristics

m17

Inventor: xxxxx

Also some sort of Limbic System Vulnerability Hack, our brain is susceptible to the cute appearance of children and reminds us of our (happy) childhood with equal aged kids. This is "used" by advertising as well as by people like Epstein that possibly used the victims to get influence in politics, science...
Scientifically spoken: It is about "Wahrnehmungspsychologie", the shape of the head, which also reminds us of ourclassmate in our childhood.
Sociopaths Ignorantly dont care about childrens future, if they can sell more junk they would even roast a child (maybe "only" with an active denial system of course) if they just can make more profit... this is a blue card with a kid, but the kids are the victims not those who abuse this principle.

Mental Institution

m19

you were right with the CIA !!!

Year: ~????

**Inventor: xxxxx**

The Concepts often as medieval as in the times of the Inquisition, but with a very modern backend. Actually torture of victims and witnesses. Offenders often talks about behavioural "Sciences" or "Therapy". Elektroschocks, insulinshocks, aggressive medication, even lethalen medicines like #Zxprexa (exposte by The @torproject ♡) are unfortunately not seldom. They obfuscate t* cards. Additional Mental Institutions often obfuscates Economic crimes, rape, murderer best known example ist the case of #Mollath (HoneyPot) Germany, maybe not even for profit and just for more obfuscation. CIA MKULTRA Project ⇔ DSM has paralleles since at least 1970, and if you look at the English Wikipedia article of Ewen Cameroon you will find Burghözli in Switzerland. Some people call the act of beeing trown into an mental institution as a nasty, nerve-racking (Quake3) **Enemy Terrototory "Game"**
Another less nice thing is, that they go against the complete family and social system (co7 Card) annoy them in the name of the patient that would just isolate him more that would lead to m32, m46 or even at1 card. Telling the patient "we will help you and calling it "therapy" is "maybe" not completely fair game.
